DECLARATION

FOR A EUROPEAN GREEN DAY

The Members of the "Sustainable Hunting, Biodiversity and Countryside Activities" Intergroup at the European Parliament meeting in Strasbourg on 26th September 2007,

informed about the actions undertaken in some Member States by various bodies and organisations of users of natural resources, among them hunters and anglers, to halt the loss of biodiversity through the adoption of initiatives to clean the countryside, wetlands, coastal areas and other natural habitats,

convinced of the importance of these actions for the prevention of soil and ground waters pollution and of the benefit that the public at large can obtain from a clean and unpolluted environment,

recognise

the meritorious efforts of the European Commission such as the Green Week;

invite

the Member States to support the actions aimed at cleaning the territory and awareness raising of all countryside users by opposing the uncontrolled degradation and loss of nature;

call on

all concerned decision makers to consider the possibility of coordinating actions at community level for launching a European Green Day.
